

1973 Piper PA-28-235 Charger
AIRCRAFT SPECIFICATIONS
N-Number: N55664 S/N: 28-7310145

This is a super Piper Charger - 235 hp and 132 kts cruise with 1,330 lbs of useful load - and 84 gallons of fuel to play with for loading!. This is the premier version of the Cherokee line and if you love a low wing Piper, the Charger is the best ever produced with a longer fuselage and larger stabilator. Docile, but beefy, this Charger has a brand new Zephyr Aircraft Engines overhaul '0' time Lycoming O-540, fresh firewall forward with new exhaust (Dawley) and overhauled mount (Kosola) and a new '0' time Hartzell 3-blade prop. Solid IFR Panel with excellent paint and interior cosmetics. Very nice PA-28-235!

Airframe: 3,090 Hours
Engine: 10 Hours SMOH
PROP: 10 HOURS SPOH

Avionics

King KMA20 switching panel
