

N2021Z Aircraft Specifications

N2021Z 1963 Cessna 150C with 160 HP Avcon STC ; Serial 15059821

Fast and Curious! Powered by the AVCON STC, this is the little 150 that can! A 160 Horsepower Lycoming O-320-D2A experience that turns the 150 in a climbing and cruising dream. Expect to takeoff in 400', initial climbs of 1,000 -1,300 fpm, +120 kt Cruise Speeds on around 8 gph. It is a real Pocket Rocket, but is mostly a single pilot ship due to useful load constraints. And it makes for a helluva banner tow platform.
